
Neurosurgery & Neurology

Neurosurgery & Neurology

Neurological surgery is concerned with the diagnosis and treatment, usually surgical, of disorders involving the brain and nervous system.

Conditions commonly seen by Neurosurgeons:

- Brain Tumours
- Pituitary Tumours
- Acoustic Neuromas
- Cervical Spine Disc Herniations
- Lumbar Spine Disc Herniations

Neurology is a medical specialty dealing with disorders of the nervous system. Specifically, it deals with the diagnosis and treatment of all categories of disease involving the central, peripheral, and autonomic nervous systems, including their coverings, blood vessels, and all interacting tissue, such as muscles.

A neurologist is a physician (not a surgeon) who specializes in neurology, and is trained to investigate, or diagnose and treat, neurological disorders.

Conditions commonly seen by Neurologists:

- Multiple Sclerosis
- Parkinsons Disease

-

Migranes and Cervical Headaches

-

Epilepsy
